

Campus Placement Predictor & Prep Recommender

Placement Assessment Report

1. Student Profile

Feature	Value
CGPA	7.5
Backlogs	0
Certifications	2
Projects	2
DSA Problems Solved	50
Internship	No
Communication Score	65
Mock Interview Score	60

2. Placement Prediction

Placement Probability	29.12%
Prediction Status	Needs More Preparation
Student Cluster	Cluster Cluster 1

3. SHAP Explanation

SHAP values explain how individual features influenced the model's placement prediction. Positive values push the prediction toward Placed, while negative values push the prediction toward Not Placed.

Feature	SHAP Value	Impact
internship	-0.6310	Negative
dsa_problems	0.4927	Positive
communication_score	-0.4013	Negative
backlogs	0.3422	Positive
mock_interview_score	-0.3199	Negative
cgpa	-0.2509	Negative
projects	-0.1451	Negative
certifications	-0.1021	Negative
branch_Computer	0.0728	Positive
branch_IT	0.0603	Positive

4. Personalized Preparation Plan

Area	Priority	Recommendation
CGPA	Medium	Maintain your academic performance and try to improve your CGPA above 8.0.
DSA	Medium	Continue solving DSA problems regularly and focus on improving problem-solving speed.
Internship	Medium	Gain practical experience through internships, live projects or relevant industry work.
Communication	Medium	Continue daily speaking practice and focus on confidence, vocabulary and pronunciation.
Mock Interview	Medium	Practice mock interviews regularly and improve your answers and confidence.

Disclaimer: This report is generated using a machine-learning model trained on synthetic student data. The placement probability is a model-generated estimate and should not be interpreted as a guaranteed placement outcome.

Built using Python, XGBoost, SHAP, K-Means, PCA and Streamlit.
